

Welcome!

This is a lapbook about how animals prepare for winter. It covers hibernation, migration and adaptation.

You need to do your own research. My children mostly use the internet to find information, but they also use whatever books we have on hand.

We don't have access to an English language library so we love using lapbooks since we are making our own books to learn from.

Hope you enjoy this one. The file is available from the Simply Lapbooks Yahoo group. It is free to share just not to sell or to use on a website for commercial benefit.

Thanks.

You can see a picture of this lapbook on my blog:

lee

A word on covers: Sometimes I make covers for you, but we don't use them. We store our lapbooks on the bookshelf and the paper covers start to tear off being pulled in and out all the time. So my kids label and color and draw and decorate directly onto the lapbook front.

Bear	Ladybug
Turtle	Gopher
Squirrel	Chipmunk
Snake	Frog
Brown Bats	Skunks

Animals That Sleep All Winter	Animals That Wake Up to Eat	To Sleep or To Wake
--	--	--------------------------------

Cut out the animal name rectangles and attach in the appropriate column. Cut out the piece all as one and fold on the lines. Fan fold so that "to sleep or to wake" rectangle is the cover and attach the back of "Animals That Sleep All Winter" to the lapbook.

What is
Hibernation?

Cut each out as one piece and fold in half. Answer the question inside. In the squirrel octagon write about how animals eat and eat and eat to prepare for hibernation.

What Changes Occur in an Animal's Body When It Hibernates?

Cut out as one piece. Fold in the Breathing flap and then the cover with the picture. Crease well. Cut on the dotted line. Lift the flaps and write about how hibernating animals breathing and body temperature changes when it sleeps. If you want, you could write under the cover flap why these changes are necessary.

Here's a scientific website [http://
www.scienceclarified.com/He-In/Hibernation.html](http://www.scienceclarified.com/He-In/Hibernation.html)

Breathing

Body Temperature

<h2>Where Do They Sleep?</h2>	
	
<h3>Turtles</h3>	<h3>Snakes</h3>

Cut out as one piece. Fold on the line above the question. Cut on the line between turtles and snakes. Write the answer inside on the backside of the flaps. On the inside write WHY turtles and snakes sleep for the winter where they do. Use complete sentences.

Write inside why some birds fly south for the winter.

Cut each piece out as one piece. Fold in half. Write the answer inside. The picture and the question are the covers.

Write a poem about birds flying south for the winter. Write one word on each line (or two if they are small words like “to”). You could cut this out anyway you like and include it in your lapbook.

Which Birds Fly South for the Winter?

Cut out as one piece. Fold in half.
Write a list of birds inside which
migrate for the winter.

NEXT PAGE!

Draw on migration routes,
each flyway in a different
color. Be sure to fill in the
boxes on the key with the
color you used to mark
each route.

Cut around the box. Leave
whole, fold in half or fold
however you please. (This is
where my son turns pieces into pa-
per airplanes and boats.)

Migration Routes

- Atlantic Flyway
- Mississippi Flyway
- Central Flyway
- Pacific Flyway

How Do Weasels
Adapt for Winter?

Cut each out as one piece
and fold in half.

How Do Beavers Prepare for Winter?

How Do
Foxes
Adapt
To
Winter
Weather?

Cut each out as one piece and fold in half.
Write your answer on the inside.

What Does It
Mean to **Adapt**?

Hibernation

Migration

Adaptation

These can be used as headers for different sections of your lapbook.
